THE VICTORIAN AWNING COMPANY

We are the UK's premier Victorian Awning manufacturer and designer, specialising solely in Victorian Awnings. All of our awnings are handcrafted in our London workshop and have been for generations.

Unlike most awning companies in the UK we do not import our awnings from abroad. We have over 50 years experience making these beautiful awnings.

THE QUINTESSENTIAL BRITISH SHOP-BLIND

The Victorian Awning, otherwise known as the 'Box-Lot' has graced British shopfronts since the 1800's.

As the strongest retractable awning available with proven reliability, it offers excellent sun and rain protection as well as style and presence.

It is the natural choice where image and functionality matter, essential for outside dining areas, shop-fronts, bars, restaurants, hotels and private residences.

EFFECTIVE BRANDING

Our awnings give presence to any shop-front, providing excellent branding potential. Our in-house design team can develop awnings to include any specific colours, logos and designs, helping to create that all important corporate identity. We can incorporate full colour logos, shop names, telephone numbers and even recreate photographs upon the awning fabric. Options include Silk Screen-Printing, Digital Printing and Signwriting by hand. We can even apply 24ct Gold-Leaf.

A BEAUTIFUL & PRACTICAL ADDITION TO THE HOME

When many British homes were built, the Victorian awning would have been the only style of awning available. Our designers work closely with customers to create a discreet product, adding to their homes' character.

Our awnings add style and luxury to a property, providing shade from the sun on hot summer days and protection from rain on wet days. An awning can create room to sit and relax, dine, socialise and hold barbecues unfettered by worry. With a good quality awning you are not restricted to the house in the winter and have a year round functional outside area.

Our awnings protect you and your family from the sun's harmful rays. Your homes interior will also be protected, saving your furnishings from sun damage and fading, allowing you to relax indoors in cool tranquillity.

THE FIRST AND STILL THE STRONGEST

The Victorian is the only awning designed specifically for the British climate and remains the only awning that can deal with all but the worst of British weather. It can be used with confidence in light storms and rain but should be retracted however during severe weather and never left unattended.

LOVINGLY HANDCRAFTED

Our awnings are still handmade today as they were in Victorian times

FABRIC

We have selected the finest fabrics for our awnings. Our Acrylic Canvas is specially coated, making it rot-proof, shrink-proof and stain resistant incorporating additional anti-mildew treatment. Our PVC is flame-retardant, hardwearing and completely waterproof. Select from our huge range of colours.

CUSTOM FINISH

Encasing the cover and roller is a box made from solid timber which, resistant to warping and deterioration. It is given numerous coats of paint applied by hand to our customers' colour specifications. Alternatively, the timber can be varnished to allow the natural grain to show.

OPERATION

As standard the awning is operated by a detachable timber retracting pole attached to the front-lath. By gently pulling forward, the awning falls into place. To close the awning, use the pole to lift the front-lath and the internal spring will aid the awning to retract. Whilst simple to operate manually some models are available with electric operation. On these models wind sensors, sun sensors and remote control are optional.

ARMS

Arms are manufactured from high grade steel for extra strength. They are custom made for each individual application and tailored to follow the shape of the building on which the awning will be installed. For enhanced projection, arms will be installed on slides that allow the arm to sit higher on a property, above head height.

INSTALLATION

We only use our own specialist installers to fit our awnings, nationwide. All installers have undergone thorough training to ensure your awning and property is left in impeccable condition when we finish.

BESPOKE CAFE BARRIERS

We have spent time designing our cafe barriers with emphasis on strength and style. Like our awnings, our cafe barriers are entirely handcrafted in our workshop and not cheap imports as often seen.

The posts are extremely sturdy with a low centre of gravity, available powder-coated to any RAL colour.

Our barriers are manufactured using our usual high quality awning fabric with cross-bars top and bottom.

The perfect solution for Restaurants, Cafes and Bars wanting to provide comfortable alfresco areas.

AWNING RENOVATIONS

We offer an extensive renovation service for existing Victorian Awnings. If you already own an awning that looks like it has seen better days, it is usually possible to renovate it rather than replace it.

Many vintage shops had awnings with their shop-fronts designed and built to house them. Often these still contain the original fittings. It is usually possible to reinstall an awning in these cases.

VICTORIAN AWNINGS IN THE 21ST CENTURY

DIGITALLY CREATED VISUALS

Utilising the latest technology we can create extremely accurate visual mock-ups, digitally imposing awnings onto photographs of properties. An essential service when selecting awning styles, fabric colours or branding designs, our visuals can prevent costly mistakes being made.

HEATING

We have a comprehensive range of heating options, enabling year-round use of your awning.

Our electric heaters offer excellent value heating. With discreet, stylish housing, they are a must for year round use in outdoor eating and drinking areas. Available in a variety of colours and options, including integrated lighting.

THE VICTORIAN AWNING COMPANY & THE ENVIRONMENT

We take our environmental responsibility seriously and we are committed to developing our business with ecological and social sustainability.

All of our timber is sourced from certified forests and has FSC accreditation.

Where possible we will always source local suppliers for our awning parts.
